Mixed Media Edition of 95

Size: 30 x 30" £1,395

This beautifully presented multi-media concept piece showcases Hyde's black and white pencil sketches from the last 20 years. He introduces a whole new level of impact with an innovative presentation which mounts a vibrant pop art image on perspex a few centimetres above the canvas. By staggering the colourful foreground with the monochrome backdrop, he transforms a two-dimensional work of art into a three-dimensional one.

To celebrate Doug's milestone anniversary a larger-than-life statement sculpture, **'Big Love'**, will be touring the UK promoting positivity and inclusion. Keep an eye on our social media for more information.

Inspired by 'Big Love' comes **'One Love'**, an elegant new departure for Hyde - a trio of monochrome, matte sculptures; each smiling figure holds out a sleek, reflective heart, in a stylish and modern 3D version of one of his most significant motifs.

This beautiful commemorative book offers collectors and art lovers an opportunity to explore Doug Hyde's artistic journey, witnessing the development of his style and discovering new layers of meaning within his work.

In the simplicity of his **black and white pencil sketches**, Doug Hyde reminds us that beauty can be found in the most uncomplicated forms and that sometimes, the power of art lies in its ability to communicate ideas with clarity and restraint. Every piece of Doug Hyde artwork begins with an idea, vividly imagined, which then finds expression on paper as a sketch. These small studies are vital as they form the core of his creative process and each line reveals a glimpse into his thoughts. They act as

the conduit through which a work of art takes shape, crystallising the moment at which the artist's vision is first realised before it is refined into a complete model for the final composition. Effortlessly merging light and shadow to create depth and texture, Hyde's sought-after sketches reveal technical skill, keen observation, and the ability to distil complex forms into their essential elements.
